BREEDING CONTRACT 2024

BROMAC ALADAR **(Dual registration with ASH and AQHA)**

ASH Rego # C2-152985

AQHA Rego # FS-25572

I _____ agree to the conditions set out hereunder:

1a. A current contract is required for each mare at the beginning of each season.

1b. The standard service fee for the 2024 season is \$1100 inc GST and Live Foal Guarantee (LFG) for live cover or LFG for chilled semen or 3 mare doses of frozen semen (This fee includes the first collection ONLY for Chilled Semen sent out in shipper box). It does NOT include freight for shipped semen.

Paid service fees also include a service certificate which can be applied for at the time of the foal's birth.

Please note: Mares will not be served unless the full service fee has been paid.

1c. Agistment costs are NOT included in the service fee price. All charges for agistment and other vet work/charges not specifically included in the service fee are to be paid in full before collection of the mare.

1d. When purchasing chilled semen, in the event that the mare doesn't conceive on the first cycle (where the collection fee is included in the service fee) there is a non-refundable collection fee of \$400 incl. GST for each subsequent shipment PLUS FREIGHT COSTS. Full payment of this fee must be made before the semen is sent. On weekends and public holidays surcharges may apply. The collection fee for subsequent collections is in addition to the one time service fee of \$1100 (which includes the first collection and packaging), must also be paid in full before any shipments will be made.

1e. When purchasing frozen semen for \$1100 – there will be a non-refundable surcharge for transportation and Liquid Nitrogen costs in the dry shipper canister (approx \$600 but is variable depending on where it is sent in Australia) and full payment of this fee must be made before the semen is sent. This surcharge is in addition to the service fee of \$1100 – for three “mare doses”, which will suffice for 3 cycles. A refundable deposit of \$350 on the dry shipper tank will also be charged and required to be paid prior to shipping the frozen shipper tank. If a pregnancy is achieved using 1 or 2 mare doses, and there are additional mare doses unused, they can be used for no extra charge, but we will require another \$440 (40% of service fee of \$1100) if a service certificate is required.

2. No contract is said to have been made until the complete Breeding Contract and non-refundable deposit is received by EVDS Pty Ltd. Payment information is found at the end of this contract.

3a. No refunds will be given but the service fee may be transferred to another mare if mutually agreed between mare-owner and EVDS. Pregnancy ultrasound scan costs are NOT included in the service fee or the handling fee if a mare returns for a second or third heat period after not conceiving on the first or second heat period.

3b .In the event of the mare not falling pregnant, the owner may negotiate a 'free return' with EVDS. A veterinary certificate must be provided by the owner to prove that the mare is not in foal. The "Free Return" does not include agistment or the handling fee charged per cycle (\$440 to cover handling mare, multiple (3-7) pre and 24 hr post service ultrasound scans, ovulation drugs, oxytocin if necessary, uterine flush, antibiotics if necessary).

4. Although we usually use live cover with the mares, there are sometimes exceptions. Due to the number of (a) visiting mares, (b) nervous mares, (c) chronic infections, (d) foal proud mares, (e) safety considerations for, mare, stallion and staff or (g) any other circumstance deemed appropriate – EVDS Pty Ltd reserves the right to use Artificial Insemination of freshly collected semen techniques without prior owner consultation. This is a very gentle way to get a mare in foal and many difficult breeders will happily conceive using this method. It is equally, if not more successful than live cover serving, and will NOT incur any further costs than live cover.

5. In order to minimise stallion use, maximise stallion fertility and maximise mare conception, EVDS Pty Ltd reserves the right to direct and implement policy on follicle testing, pregnancy testing and subsequent drug therapy, such as antibiotics, oxytocin, ovulation drugs and uterine flushes in the few days leading up to and the 48 hours after ovulation. This is usually included in the handling fee (not charged on the mare's first cycle of the season at EVDS). At all times minimising the cost to the mare owner and maximising the successful conception without compromising the mare's wellbeing, which will be the highest priority.

6a. Mares must not have hindshoes on if they are to be served. If the mare is shod behind, we reserve the right to remove the shoes or apply boots to cover her hind shoes.

6b. EVDS Pty Ltd may refuse to inseminate the mare if:

- i. The mare poses an unacceptable danger to herself, her handlers or the EVDS clinic and or property,
- ii. The mare is unsuitable for breeding, as determined by the EVDS Veterinarian in his/her absolute discretion; or
- iii. The breeder fails to comply with clause 7.

7. The mare owner or agent must ensure that on arrival at EVDS (160 Old Lilypool Road, South Grafton, NSW), the mare will be:

- i. Halter broken and able to be led;
- ii. Known to have a vaccination history by the owner, regardless of whether vaccinated or not. Should your mare contract a disease that is able to be vaccinated against, such as Tetanus, Strangles, Hendra, Herpes, or Salmonella whilst at EVDS, there can be no claims made against EVDS whatsoever to compensate for loss or treatment, cost to isolate her etc. It is the mare owner's responsibility to protect the mare against these diseases through vaccination at least 3 weeks prior to arrival at EVDS.
- iii. Unshod on back feet
- iv. Free of illness and disease; and
- v. Free of injury, except as disclosed in this contract.

8. EVDS Pty Ltd staff will take all reasonable care but shall not be liable to the owner or the agent in the event of the death of the mare (s) or in the event of the same receiving any injury or suffering any illness howsoever arising.

9. There is a "live foal guarantee" for live cover, chilled and frozen semen services. A veterinary certificate must be supplied to EVDS stating the reason why there was no live foal and EVDS must be notified immediately. In most cases a 'Free Return' will be negotiated.

10. In the event of the stallion being unavailable – due to death, injury, competition commitments or sold – EVDS will offer the use of Bromac Aladars' frozen semen if agreed upon by owner. Mares not covered as a result of the stallion being unavailable will not be compensated for daily charges and or any other costs, but a 'free return' may be negotiated.

11. Agents please be aware – if signing on behalf of an owner who subsequently defaults on payment the agent then becomes liable for all outstanding costs.

We thank you for choosing to send your mare to Bromac Aladar!

Mare details

Mares Name:

Brand: Near shoulder:

offside shoulder:

rump:

Colour:

Breed:

Microchip #:

Markings:

Breed and her Registration number:

Maiden mare? yes/no

Foal at Foot? yes/no

Did mare conceive last time she was bred? yes / no

If no, please provide details of why to help us get her in foal as soon as possible:

Has your mare had a vaginal/uterine infection in past seasons (this info will help us to get her in foal)?
yes / no Details if yes:

To help us keep your mare and our staff as safe as possible, please answer:

Is she easy to catch? yes / no

Does your mare tie up without pulling back? yes / no

Does your mare, when stressed or frightened:

Kick yes / no

Bite yes / no

Can your mare be hobbled? yes / no / not sure

Is your mare up to date with vaccinations against:

1) Hendra Virus? Yes – date of last vaccine / no / not sure

2) Strangles? Yes - date of last vaccine / no / not sure

3) Tetanus? yes - date of last vaccine / no / not sure

Worming: Last wormed with on approx date:

Swabbing certificate attached? yes / no / not done.
